

GLASS SHOPS & INSTALLERS

Keep late-stage damage from defining the job.

Add a qualified restoration option to the punch-list and closeout conversation.

A PRACTICAL BUSINESS CASE

TIME

01

Address selected punch-list damage within a planned closeout workflow.

COST

02

Compare repair with reorder, access and remobilization costs.

QUALITY

03

Agree viewing conditions and a representative trial with project stakeholders.

WHEN RESTORATION IS WORTH EVALUATING

A localized surface defect can lead to a reorder, another site visit and coordination across trades. Establish whether restoration belongs in the closeout plan.

TYPICAL CONDITIONS TO ASSESS

- Handling scratches
- Chemical surface damage
- Post-construction abrasion

EXPLORE EQUIPMENT AND SUPPORT

Professional Grade System

FROM ASSESSMENT TO ACCEPTANCE

- 1 Identify elevation, opening and pane.
- 2 Classify the observed condition.
- 3 Agree trial and viewing conditions.
- 4 Attach closeout evidence.

Discuss a closeout plan

Start with your glass, damage and acceptance requirements.
