

JAN-SAN & FACILITY SERVICES

Give every site a clear escalation path.

Build a trained restoration capability for glass concerns beyond routine cleaning.

A PRACTICAL BUSINESS CASE

TIME

01

Create a consistent route from site observation to qualified assessment.

COST

02

Price an additional restoration service around the actual scope and resources required.

QUALITY

03

Use shared assessment language, training and inspection checkpoints across locations.

WHEN RESTORATION IS WORTH EVALUATING

When glass still looks wrong, the service team needs a responsible next step. Distinguish residue, transferred material and surface damage before deciding what to propose.

TYPICAL CONDITIONS TO ASSESS

- Persistent mineral staining
- Cleaning abrasion and swirls
- Metallic transfer marks

EXPLORE EQUIPMENT AND SUPPORT

Enterprise Grade System

FROM ASSESSMENT TO ACCEPTANCE

- 1 Complete the approved cleaning test.
- 2 Record site, pane and condition.
- 3 Route to a qualified assessor.
- 4 Close with scope and next action.

Plan a multi-site capability pilot

Start with your glass, damage and acceptance requirements.
