**GlassRenu Announces Scratch Removal Performance Guarantee**

*Industry's First and Only Performance Guarantee Makes Professional Tool a Standout  
Among All Competitive Systems*

PACHECO, Calif., April 13, 2009 – GlassRenu®, manufacturers of the industry's premier solution for removing scratches and acid damage of any size and depth from all types of glass, today announced it will offer the industry's first product performance guarantee. Asserting confidence in its product and customers' overwhelming satisfaction with the system, GlassRenu pledges to buy back the system from new customers who are not satisfied with the glass repair results they achieve during the first 30 days of ownership.

"Others claim dramatic results, ease of use and distortion-free repairs-- but we're the only manufacturer willing to back it up with a performance guarantee," commented GlassRenu COO Cody Thomas. "Over and over, we've proven to our customers that we offer the best method to remove scratches and acid-etch graffiti from glass without distortion. By offering this performance guarantee, we underscore our confidence in our position as the industry's premier glass repair solution."

Available to new purchasers of the GlassRenu system in the United States, GlassRenu's Product Performance Guarantee protects its customers' investment by pledging that the company will buy back any system within 30-days of delivery if, after reading the instructions provided and attempting multiple repairs, customers are dissatisfied with the performance of the GlassRenu System and unable to produce distortion-free repairs faster, cleaner and at a lower cost-per-repair than with any other commercial system.

Developed in the field by a veteran glass technician, GlassRenu's signature Contractor Grade Glass Renewal System quickly removes glass damage without visible distortion. Up and running in under two minutes, the system uses dry, not wet, technology to remove even the most severe scratch or acid damage from all types of glass. The system features an easy-to-learn, three-step process that relieves users from having to switch between numerous tools, and utilizes GlassRenu's patented RenuDisk® technology. Even novice users can restore up to 15 square feet of glass per hour, without visible distortion.

The Contractor Grade Glass Renewal System is available for purchase as a field-ready kit with all tools and enough materials to repair approximately 500 square feet of glass. To order, or for more information about the system and GlassRenu's industry-first product performance guarantee, please visit [www.glassrenu.com](http://www.glassrenu.com).

**About GlassRenu**
